Ivan Koptiev

Data Science Student | Machine Learning & AI

Kingston, Rhode Island, USA
koptew.ivan@gmail.com | +1 (401) 529-9164 | Portfolio | GitHub | LinkedIn

Education

University of Rhode Island — Kingston, RI
B.S. Data Science, Honors College, Expected May 2029 — *2026 – Present*
Helen Izzi Schilling STEM Scholar

Cranston High School West — Cranston, RI
GPA: 3.975/4.0 — *2022 – 2026*
Class Rank: Top 5% (20/404)

Experience

Machine Learning Research Volunteer – URI AI Lab — Sep 2026 – Present

- Collaborating with a team of Machine Learning specialists and Marine Biology interns on the OceanDetect research project at the University of Rhode Island's AI Lab.
- Our work focuses on analyzing deep-sea footage using computer vision, including object detection, tracking, and instance segmentation, to identify and study marine species such as crabs, squid, and fish.
- Working with state-of-the-art models such as YOLO and SAM, with responsibilities including labeling, annotation, model training, evaluation, and optimization.

Machine Learning Intern – SERP — Aug 2025 – Feb 2026

- Built a real-time computer vision system for boxing analytics using YOLO and Bot-SORT.
- Designed a punch detection and match statistics pipeline; contributed to dataset collection, labeling, and model optimization.
- Developed n8n AI automation workflows for social media and voice-based systems.

Projects

Transformer-Based Sentiment Analysis with BERT — 2024 – 2025

- Fine-tuned BERT for sentiment classification, achieving 81% accuracy on 5,000 validation examples.
- Built an inference pipeline and evaluated model performance using precision, recall, and F1-score.

Fashion GAN Generator — 2024 – 2025

- Implemented and trained a GAN from scratch on Fashion-MNIST to generate synthetic fashion images.
- Evaluated generated outputs against the training distribution, achieving approximately 80–85% visual similarity.

Full projects: Portfolio / GitHub

Awards & Achievements

- QuestBridge National College Match Finalist — 2025–2026
- AP Scholar / Honor Recognition (College Board) — 2024–2026

Skills

Programming: Python, R, Java
Machine Learning: PyTorch, TensorFlow, scikit-learn
Data Analysis: pandas, NumPy, matplotlib, ggplot2
Languages: English (fluent), Ukrainian (native), Russian (native), French (A2–B1), Italian (A2–B1)
